IT Assessment Service

A Zero-Cost Service Specifically for Businesses with Less Than 100 Employees

Your IT infrastructure is what powers your business, and it should always deliver optimized performance and security. Rize Technologies understands that and, for more than 10 years, has been laser-focused on providing a comprehensive suite of managed IT services for growing businesses. This includes IT infrastructure upgrades, migration to cloud services, securing remote workers, strengthening cybersecurity defenses, deploying business-critical software applications to optimize operations, and much more.

And, as part of our commitment to provide “white glove” customer care, we also offer businesses like yours a comprehensive IT Assessment Service that provides valuable insights into the performance, security, and overall effectiveness of your current IT infrastructure and related services.

This IT Assessment Service is normally priced at \$1,995, but Rize Technologies delivers the service at zero cost to businesses with less than 100 employees. Why? Because growing businesses are the lifeblood of our economy and an effective IT infrastructure is critical to your success in this digital age. We obviously hope that you would choose to partner with us when you need help with additional IT services but there is absolutely no cost or obligation associated with this service.

This complimentary service consists of two components:

- **Assessment of Your IT Infrastructure** - We will analyze nine critical areas of your IT infrastructure, including network performance, mobile devices, telecommunications, applications, endpoint security, and even dark web monitoring.
- **Assessment of Operations and Resources** - We will evaluate the technology vendors, cloud services, internal staff, and and external support services you rely on to manage your IT infrastructure and grow your business.

The entire process can be done quickly and remotely, without any disruption to your network or your business. Following the assessment, we'll schedule a 30-minute call with you to share the report, discuss key findings, and answer any questions you might have. Based on the results of the report, we might also provide your firm with a project proposal to address any specific IT issues that could be impacting the performance of your business.

We encourage you to take advantage of this complimentary IT Assessment Service. To schedule a time that is convenient for you, please use the calendar link below.
