

Here's Why Your Law Firm Needs

# A Stronger Cybersecurity Defense...Now!

Our free network penetration testing service is the best way to get started.

**According to recent data published by the American Bar Association, nearly 1/3 of all US law firms have been victims of targeted cyber attacks. Many of these breaches have been associated with ransomware, phishing, software vulnerabilities, and more. These attacks typically take several months to discover and fully remediate. By then, the damage has been done - confidential client information exposed, business operations disrupted, and brand reputation damaged. And that doesn't include the potential monetary impact.**

**It's Time to Take Cybersecurity Seriously, and Rize Technologies Can Help.**

**Your First Step to Stronger Security** - Rize Technologies is a managed IT services provider that has been working exclusively with law firms for more than a decade. We offer a complimentary penetration test service to law firms concerned about potential cyber attacks. Penetration testing is a quick and painless professional service performed by our cybersecurity experts to identify the specific areas of your network that are vulnerable to cyber attacks. It can help you ensure your firm has a strong security posture to defend against malicious activities by cyber criminals. Operating remotely and without any disruption to your network or business, our expert team will:

- Test the security strength of 10 endpoint devices.
- Analyze vulnerabilities and assess potential damage.
- Provide a detailed report and a 30-minute call with a security expert.

**Why Are We Doing This?** We're passionate about protecting law firms and have seen firsthand what can happen when cybersecurity isn't a priority. Our goal is simple—help you strengthen your defenses. While there's no cost or obligation to work with us beyond this complimentary test, we obviously hope to earn your trust should you need further IT support services.

**Don't wait until your firm has become yet another victim of a cyber attack.  
Take advantage of this zero-cost, zero-obligation professional service offering.  
Your firm's security depends on it.**

**SCHEDULE YOUR FREE PENETRATION TESTING TODAY!**
